Medellin, Colombia

Professional profile

Dedicated Front End Developer with over a year of experience in website development, specializing in HTML, CSS, JavaScript, and React JS. Proficient in creating dynamic and responsive web applications that deliver exceptional user experiences. Additionally, I possess knowledge in software development and programming in C#. I am skilled in implementing Agile methodologies, particularly SCRUM, to ensure efficient project management and collaborative teamwork, resulting in successful project deliveries..

Technical skills

HTML, CSS, JavaScript, React Js, C#, Adobe suite (Photoshop, After Effects, Illustrator, Media Encoder)

Education

2023	Full Stack Web Development PROTalento
2023	Software Development Pascual Bravo University Institute

Experience

Fully responsive portfolio

March 2024 – April 2024

Showcasing my skills as a Front End Developer, my portfolio is a sleek and responsive showcase of my work. Designed with an attractive aesthetic, it highlights my projects in a modern and intuitive interface. Built with React, it ensures seamless navigation and a visually appealing experience across devices.

"Soren": A Disney-Inspired Design

March 2024

Experience the magic of "Soren," a fictional Disney movie, through its captivating landing page. Designed with Disney's signature charm, this visually stunning page transports visitors into the enchanting world of the film. With its whimsical design and attention to detail, it captures the essence of Disney storytelling at its best.

HelpDesk Analyst I

September 2023 - Current

As a HelpDesk Analyst, I provided comprehensive technical support to the Steward Health Care network of hospitals. My experience includes solving technical problems, maintaining the network and ensuring smooth communication between the different departments and hospitals. My proactive approach and my ability to work under pressure allowed me to offer exceptional service, ensuring operational efficiency at all times.

Restaurant Web Project

May-June 2023

I successfully developed a website for a restaurant using technologies such as HTML, CSS, JavaScript and React JS. With an attractive, friendly and optimized design, I managed to create a visually attractive interface that provides an exceptional user experience.

Project student grading system

October-November 2022

In this project, I managed to develop a desktop application that simulates an academic environment for the registration of student grades, also with ease to connect it to a database; C# was used as the main language and an elegant and easy to understand design was maintained.
